Our
EXPERTISE

TEAMWORK LEADS TO SUCCESS

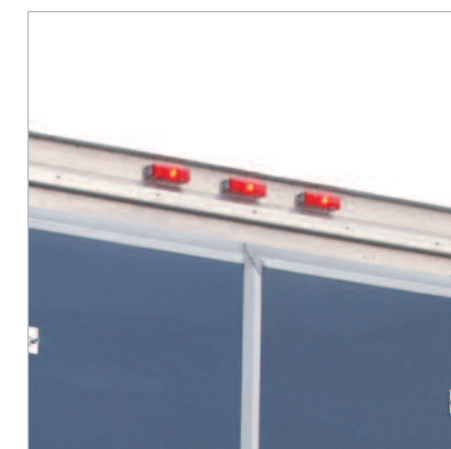

Since its beginning in 2004, Fourgons Leclair has rapidly become an industry leader in customized truck body manufacturing. The company has successfully gained its market share with a complete range of high-quality products and turnkey solutions.

Durable stainless steel front frame

Anti-sag roof bows

Long life L.E.D. lights

Inside stainless steel cam-lock

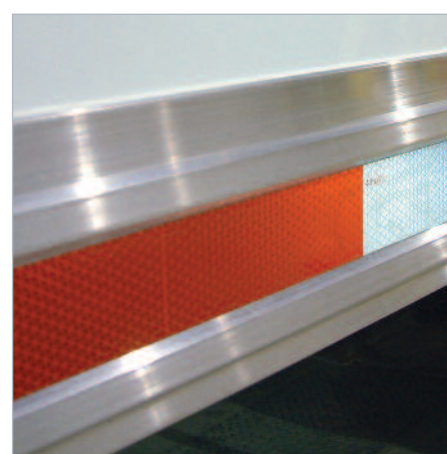

Customized interior finish

THE LECLAIR DIFFERENCE

An efficient and reliable team that constantly strives to do more. That's the Leclair difference.

- I-beam extruded aluminum subbases provide greater payload capacity.
- No surface bolts or rivets for a more attractive finish.
- Maximum interior space.
- Attractive and durable stainless steel front frame.

5 3/4" rub rail with two exterior reinforcements

Aluminum rear frame

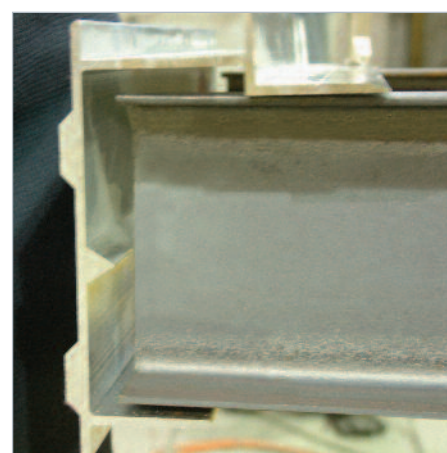

Widest roll-up door on the market

Panel walls with no rivets or bonding

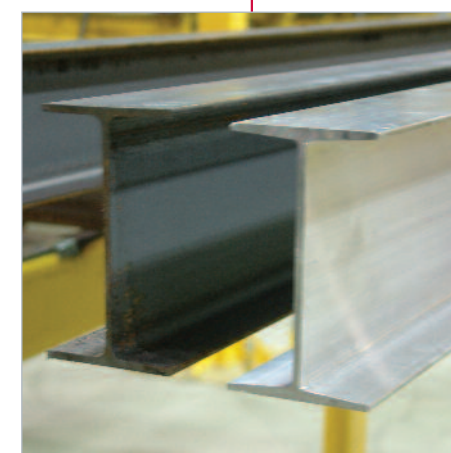

97" interior width

ATTENTION TO DETAIL

We pay attention to every detail in our wide selection of options and our components are chosen for their durability in order to give you the best available truck body on the market.

Rub rail with interior V and no exterior bolts

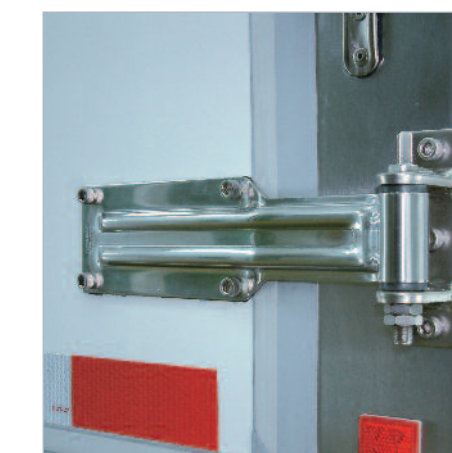

Steel and aluminum I-beam substructure

Full-length, 2" reflective strip

Anti-sail mudguards

All stainless steel hardware

QUALITY IS WHAT MATTERS

The Fourgons Leclair team takes complete charge of every truck that drives through its Bois-des-Filion plant near Montreal. In addition to its truck body assembly and installation services, the factory also manufactures the parts and components it needs using the highest quality materials available.
